

Mermaid Diagrams

This example document uses the [pandoc Lua filter diagram](#) to generate Mermaid diagrams from embedded code blocks. [Mermaid](#) needs to be installed before the document can be rendered with the option `--lua-filter diagram.lua`.

Entity Relationship Diagram

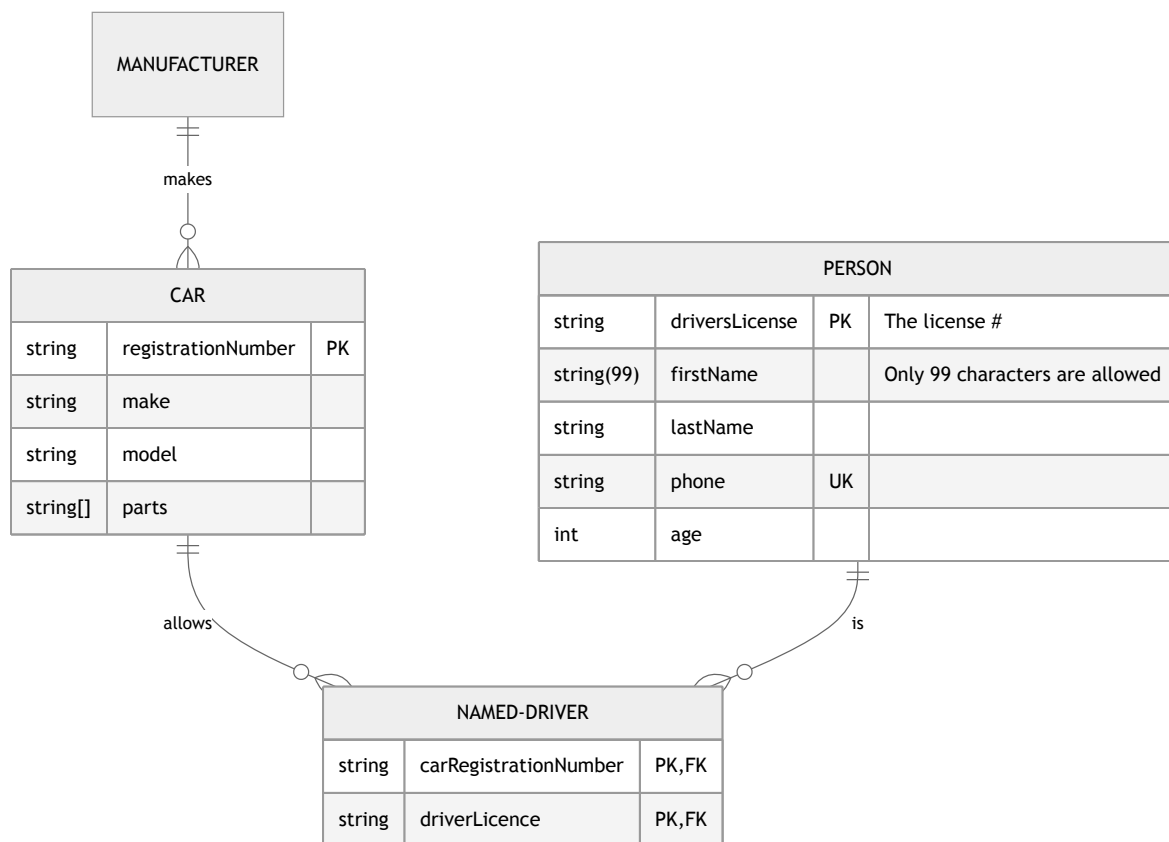

Figure 1: This entity relationship diagram has a caption. The diagram is copied from the Mermaid documentation at <https://mermaid.ai/open-source/syntax/entityRelationshipDiagram.html#attribute-keys-and-comments>. The caption can contain long explanatory text and is now filled with placeholder text. Porrigitur et Pallas nuper longusque cratera habuisse sepulcro pectore fertur. Laudat ille auditi. vertitur iura tum nepotis causa; motus. Diva virtus! Acrota destruitis vos iubet quo et classis excessere Scyrumve spiro subitusque mente Pirithoi abstulit, lapides.

Sequence Diagram

The following sequence diagram omits a caption but uses the forest theme. A comprehensive overview of theming-related configuration options [can be found in the Mermaid documentation](#).
