Font: Emoji with *OpenMoji*

This example document demonstrates the use of emoji characters, which should be displayed using the *OpenMoji* font. The main font, specified by the variable `mainfont`, is *Source Sans 3*, which does not include emoji characters. Missing characters are provided by *OpenMoji*, set as the fallback font using the variable `mainfontfallback`. The characters are grouped according to their Unicode code blocks.

LuaTeX must be used as the PDF engine in combination with `mainfont` for `mainfontfallback` to take effect. This is why `mainfont` is explicitly set to *Source Sans 3*, even though it is already the default font in the Eisvogel template.
