

Landscape with pandoc-latex-environment and lscap

This example illustrates how the `pandoc-latex-environments` filter can be used to generate a `landscape` environment (from the `lscap` package) for presenting page content in landscape format.

```
1 ::: landscape
2 This content will be in landscape format. It is usually used for large
   images or tables.
3
4 ![Nam liber tempor cum soluta nobis mazim placerat facer.](image.png)
5 :::
```

This content will be in landscape format. It is usually used for large images or tables.

Figure 1: Nam liber tempor cum soluta nobis mazim placerat facer.
